## No of days to First Patient Consented

Projects have been colour coded to identify length of time from submission of an application to first patient consented Key: BLACK - No recruitment > 70 days , RED+ - Recruited > 100 days, RED - Recruited 71 - 100 days, GREEN - Recruited <70 days

## Reasons for Delays in First Patient Consented

Internal delay: delay due to UH Bristol Trust issue

Both internal and external delay: contributing factors for delay from both UH Bristol and external party, e.g. contract review External delay sponsor: examples include delayed site initiation visits, green light visit.

External delay protocol design: protocol stipulates that very rare patient group/low recruitment or other protocol design which means site is unable to reasonably expect to recruit within 70 days.

External delay University: any University involvement contributing to the delay- e.g. contract review

External delay other Trust: a delay caused by an external Trust e.g. reviewing contracts, delaying initiation.

External delay other: any other delays which fall outside the above categories and are due to factors external to the Trust.
