

# MEN AND WOMEN NEEDED FOR A BLOOD PRESSURE STUDY

Bristol CardioNomics Research Group (based at the Bristol Heart Institute and the University of Bristol) are seeking, men and women to participate in a research study about brain blood flow in people with high blood pressure.

The purpose of this study is to learn about brain blood flow in individuals with high and normal blood pressure.

Who can take part?

- Men and women who are not pregnant
- Aged between 18 and 75 years
- No known major illness (other than high blood pressure)

This study includes 2 visits:

- 1) A screening visit to check blood pressure and general health,
- 2) An MRI scan.

You will be compensated for your travel.
